Web on iOS Android Please note: Making playlists public or private does not affect the privacy settings of songs the playlist. However, public playlists will be directed to streams of your followers, so make sure that the tracks stored in the playlist are public and can be viewed by others. In addition, there is no way to add songs at the top of the list. All new tracks will appear in the can be rearranged in a different order later. On the Web To add tracks to an existing playlist, click Add to playlist below any track to insert it into the playlist. To create a new playlist, click the New tab. When you create a new playlist, you can decide the name and, if you want the playlist to be public or private. Please note: making a playlist publicly or privately does not affect the privacy settings of songs within the playlist. However, public playlists will be directed to streams of your followers, so make sure that the tracks stored in the playlist are public and can be viewed by others. We also recommend limiting the number of songs in a playlist to a maximum of 250 so that it can be easily loaded. On the Now Playing screen on iOS (the screen that appears when the track plays), you'll see three dots in the lower-left corner pointing to the More button. Tap this, and then tap Add to playlist. You'll be prompted to choose a playlist to add a track to, or create a new playlist by tapping the plus sign in the upper-right corner. Please note that playlists created in the app will be automatically set to private. They can be easily set to public in the app by going to the playlist page and tapping the three dots on the right below the cover image of the playlist. You can select 'Make playlist public' from the menu. Please note: making a playlist publicly or privately does not affect the privacy settings of songs within the playlist. However, public playlists will be directed to streams of your followers, so make sure that the tracks stored in the playlist are public and can be viewed by others. On the Android Now Playing screen (the screen that appears when the track plays), you'll see three dots in the lower-right corner pointing to the More button. Tap this, and then tap Add to playlist. You'll be prompted to choose a playlist to add a track to, or create a new playlist by tapping the plus sign in the upper-right corner. From there, you can choose the name of the playlist and whether you want it to be private or public.
